Session Abstract
Title: Dynamic Government: Solutions for the government of tomorrow

This session will address the following topics:

E-Budgeting Solution

The main objective of the E-Budgeting Solution is to cater for the collection of budget requests from all departments of the organization. It will create one centralized database that will be accessible by the authorized Finance Department’s team members "الإدارة المالية". The team will be able to review, amend and consolidate the entire budget requests received from all government organization. The solution features an extensive reporting tool that allows viewing the data partially or collectively based on various business criteria.

IT Governance Service Desk Solution

The main objective of the solution is to provide a Help desk and IT Asset Management solution that fulfills the Government agencies’ requirements to improve speed, accuracy, and agility of their internal IT Services. The solution also helps organizations manage their risks and costs. The solution is ITIL and ISO 9001 compliant.
